PROJECTS

MyBlog- Website | PHP | MySql

● This project highlights my proficiency in web development and PHP programming. The blog website boasts a user-friendly interface, allowing visitors to effortlessly navigate and explore a wide range of engaging blog posts.

● The website features categories and tags, facilitating targeted searches and making it convenient for users to find topics of interest.

● I also integrated an efficient admin panel that enables me to manage blog posts , Categories, tags , all dynamic data on website securely.

● Admin panel have different module and Role base access feature.

iDiscuss - Coding Forums | PHP | MySql | Bootstrap
